Education

Delhi Technical Campus (Affiliated to GGSIPU)
Bachelor of Technology in Computer Science and Engineering

Greater Noida, UP
Expected May 2026

Experience

SheandSoul

Backend Engineer

Remote

June 2025 – December 2025

- Architected a scalable **Microservices architecture** using **Java (Spring Boot)** and **Supabase** (PostgreSQL), implementing **JWT Authentication** and Role-Based Access Control (**RBAC**) to secure sensitive user data.
- Engineered an **AI-driven support system** by integrating **OpenAI API** and custom NLP models, automating customer query resolution and reducing **Mean Time to Resolution (MTTR)** by **70%**.
- Developed a high-precision predictive algorithm for health tracking using **Java Streams** and statistical modeling, achieving **99% accuracy** in forecasting cycles based on historical datasets.
- Optimized RESTful API performance and complex SQL queries by implementing **Redis Caching** and database indexing, cutting server response latency by **40%** under high-load conditions.

Projects

Smart Traffic Enforcement System | *Java, Python, YOLOv8, Computer Vision*

- Engineered a real-time traffic violation detection system integrating **YOLOv8 models** for vehicle tracking and classification.
- Automated the evidence logging process (speeding, signal jumps) by capturing snapshots, reducing manual surveillance efforts by **60%**.
- Processed video feeds at **30+ FPS** with high accuracy, utilizing Java backend logic for efficient data management and automated challan generation.

Real-Time Chat Infrastructure | *Java, WebSockets, Multithreading*

- Built a low-latency chat server using **Java Socket Programming**, enabling seamless bi-directional client-server communication.
- Reduced message delivery latency by **50%** compared to traditional polling methods by implementing efficient threading models and **WebSocket** protocols.
- Designed a fault-tolerant architecture capable of handling concurrent user connections with minimal downtime.

Retro Arcade | *React.js, Firebase, Tailwind*

- Implemented secure authentication (**OAuth**) using Firebase, streamlining the onboarding process for new users and securing user data.
- Managed SEO strategies for the gaming platform, significantly increasing organic user traffic and visibility by **25%**.

Technical Skills

- Languages:** Java (Advanced), JavaScript, React, Python, SQL
- Backend & Frameworks:** Spring Boot, Microservices, REST APIs, GraphQL, Servlets, JDBC, Hibernate
- Databases:** MySQL, MongoDB, Supabase, Redis
- Tools & Platforms:** Docker, AWS (EC2, S3), Jenkins (CI/CD), Linux, Git/GitHub, Postman, Swagger
- AI & Core Concepts:** OpenAI API Integration, Computer Vision (YOLOv8), System Design, DSA (150+ Solved)
